

To close an application:

- 1) Should "Quit" or "Exit" be used?
- 2) Should there be an icon next to Quit/Close... if so, what?
- 3) Should the menu be visible or should you need to use a right click?
- 4) What should the hot-key be?
- 5) What color should the menu be: gray or white?
- 6) What should the menu be labeled... File, the name of the program, what the program works with... what?
- 7) Should there be an underlined shortcut key for that item?
