Below are the results of attempting to parse this document with an SGML parser.

1. **message**: Line 62 column 33: cannot generate system identifier for general entity "text".
   
   `...>endtag><entref name="text" id="text">`.
   
   An entity reference was found in the document, but there is no reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

2. **message**: Line 62 column 97: general entity "left" not defined and no default entity.
   
   `...>endtag><entref name="left" id="left">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

3. **message**: Line 62 column 97: reference to entity "text" for which no system identifier could be generated.
   
   `...>endtag><entref name="text" id="text">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

4. **message**: Line 62 column 97: entity was defined here.
   
   `...>endtag><entref name="text" id="text">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

5. **message**: Line 62 column 132: cannot generate system identifier for general entity "kort".
   
   `...>endtag><entref name="kort" id="kort">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

6. **message**: Line 62 column 132: general entity "kort" not defined and no default entity.
   
   `...>endtag><entref name="kort" id="kort">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

7. **message**: Line 62 column 132: reference to entity "kort" for which no system identifier could be generated.
   
   `...>endtag><entref name="kort" id="kort">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

8. **message**: Line 62 column 132: entity was defined here.
   
   `...>endtag><entref name="kort" id="kort">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

9. **message**: Line 62 column 132: cannot generate system identifier for general entity "cond".
   
   `...>endtag><entref name="cond" id="cond">`.
   
   This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

10. **message**: Line 62 column 132: general entity "cond" not defined and no default entity.
    
    `...>endtag><entref name="cond" id="cond">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

11. **message**: Line 62 column 132: reference to entity "cond" for which no system identifier could be generated.
    
    `...>endtag><entref name="cond" id="cond">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

12. **message**: Line 62 column 132: entity was defined here.
    
    `...>endtag><entref name="cond" id="cond">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

13. **message**: Line 62 column 132: cannot generate system identifier for general entity "right".
    
    `...>endtag><entref name="right" id="right">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

14. **message**: Line 62 column 132: general entity "right" not defined and no default entity.
    
    `...>endtag><entref name="right" id="right">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

15. **message**: Line 62 column 132: reference to entity "right" for which no system identifier could be generated.
    
    `...>endtag><entref name="right" id="right">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

16. **message**: Line 62 column 132: entity was defined here.
    
    `...>endtag><entref name="right" id="right">`.
    
    This is usually a cascading error caused by an undefined entity reference or use of an unencoded ampersand (&) in a URL or body text. See the previous message for further details.

17. **message**: Line 110 column 18: value of attribute "ALIGN" cannot be "MIDDLE".
    
    `...>endtag><align name="ALIGN" id="ALIGN" value="MIDDLE">`.
    
    The value of the attribute is defined to be one of a list of possible values but it is not in the list of possible values for this attribute. For instance, the "ALIGN" attribute must be either specified as "left" or "right" or "center" or "middle" or "justify".

18. **message**: Line 120 column 12: required attribute "ALT" not specified.
    
    `...>endtag><img name="img" id="img" src="/images/image.jpg" width="100" height="100" align="center" alt=""/>`.
    
    The attribute given above is required for an element that you've used. For instance, in most HTML and XHTML document types the "alt" attribute is required in the "image" element and the "align" attribute is required for the "img" element. Possible values for the "align" attribute are "left", "right", "top", "bottom", "middle", "center", "baseline", "absmiddle", and "secondaryBaseline".

19. **message**: Line 120 column 12: "TABLE" not finished but containing element ended.
    
    `...>endtag><table name="TABLE" id="TABLE"/>`.
    
    The end tag given above is not matched by an opening tag. You may have omitted it. For instance, in most HTML and XHTML document types the "table" element is required in the "table" element and the "end" attribute is required for the "end" element.

20. **message**: Line 120 column 12: end tag for "TABLE" not allowed, but its declaration does not permit this.
    
    `...>endtag><table name="TABLE" id="TABLE"/>`.
    
    The end tag above was not matched by an opening tag. You may have omitted it. For instance, in most HTML and XHTML document types the "table" element is required in the "table" element and the "end" attribute is required for the "end" element.

Below are the results of attempting to parse this document with an SGML parser.

1. **Line 27 column 20 type does not allow element "STYLE" here.**
   ```html
   <head type="text/css">
   </head>
   The element name "head" has a nearby id where it is not allowed. This could mean that you have incorrectly nested elements -- such as a "right" element in the "body" section instead of inside "head" -- or few elements that overlap (which is not allowed).
   ```
   
   2. **Line 70 column 20 there is no attribute "BACKGROUND".**
   ```html
   <head>
   </head>
   You have used the attribute named in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "stylesheet" document type with a document that uses frames. For example, you must use the "Transitional" document type to get the "background" attribute, or by using vendor proprietary mechanisms such as "background" (this is totally bad by using CSS to achieve the desired effect instead).
   ```
   
   3. **Line 60 column 60 start-tag for "TR" omitted, but its declaration does not permit this.**
   ```html
   <tr><td>
   </td></tr>
   The attribute name "cellspacing" is not supported in the "tr" element, and the "cellspacing" attribute is required in the "td" element. You must specify the attribute or use its default value of 0.
   ```
   
   4. **Line 70 column 129 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   5. **Line 10 column 20 start-tag for "TR" omitted, but its declaration does not permit this.**
   ```html
   <td>
   </td></tr>
   The attribute name "colspan" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "colspan" attribute is required in the "td" element. You must specify the attribute or use its default value of 0.
   ```
   
   6. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   7. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   8. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   9. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   10. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   11. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   12. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   13. **Line 20 column 61 required attribute "ALT" not specified.**
   ```html
   <img src="/images/"> <br>
   The attribute name "alt" is required for the element that you've used, but you have not included it. In most HTML and XML documents, the type attribute is required in the "script" element and the "alt" attribute is required in the "img" element. Typical values for the type attribute are "text/plain" for analysis, and type "xhtml-enc" for example.
   ```
   
   14. **Line 207 column 12 general entity "show" which is not finished.**
   ```html
   ![image](image.png)
   Most likely, you missed tags and closed them in the wrong order. For example, `&lt;img src="/images/"> <br>` is not acceptable, as seen should be closed before end. Acceptable being in a separate, unclosed group.
   ```
   
   15. **Line 337 column 61 cannot generate system identifier for general entity "show".**
   ```html
   ![image](image.png)
   An entity reference was found in the document, but there is no reference by that name defined. Often this is caused by misspelling the reference name, unescaped ampersand, or by leaving off the quoting characters. The most common cause of this error is unescaped ampersands in URLs as documented by the 1998 SGML in "Note on entities in URLs".
   Entity references defined with an unescaped (but not end) a semicolon. If you want to use a literal ampersand in your document you must enclose it in "&" and then a semicolon. If you need to use an entity reference with a semicolon in your entity reference may get interpreted in connection with the following text. Also keep in mind that named entity references are case-sensitive, adding, and deleting, are different characters.
   Note that this document contains entities used by entity references and it types up to 5 separate messages from the Validator. Usually I will not all disappear when the original problem is fixed.
   ```
   
   16. **Line 207 column 61 general entity "show" not defined and no default entity.**
   ```html
   ![image](image.png)
   This is usually a missing error caused by an unescaped entity reference or one of unescaped ampersand (b) in an &lt;img or &lt;body text. See the previous message for further details.
   ```
   
   17. **Line 207 column 61 reference to entity "show" for which no system identifier could be generated.**
   ```html
   ![image](image.png)
   This is usually a missing error caused by an unescaped entity reference or one of unescaped ampersand (b) in an &lt;img or &lt;body text. See the previous message for further details.
   ```
   
   18. **Line 337 column 61 entity was defined here.**
   ```html
   ![image](image.png)
Below are the results of attempting to parse this document with an SGML parser.

### 1. Line 20 column-20: document type does not allow element "STYLE" here.

**error type:** &lt;error &gt;

The element stylesheet has been found in a section where it is not allowed. This would mean that you have incorrectly nested elements - such as a ‘<style>’ element in the ‘body’ section instead of inside ‘head’ - or have elements that overlap (which is not allowed).

### 2. Line 20 column-20: there is no attribute "BACKGROUND".

**error type:** &lt;error &gt;

You have used the attribute named color in your document, but the document type you are using does not support that attribute for this element. This error is often caused by incorrect use of the "document type with a document that uses frames (e.g. you may use the “Transitional” document type to get the "<frame&gt;" attribute), or by using vendor-specific extensions such as "<background&gt;" (it is usually best by using CSS to achieve the desired effect instead)

### 3. Line 40 column-60: start tag for "TR" omitted, but its declaration does not permit this.

**error type:** &lt;error &gt;

### 4. Line 20 column-20: required attribute "ALT" not specified.

**error type:** &lt;error &gt;

The attribute given above is required on an element that you've used, but you have omitted it. For instance, in xml html and XML documents, the "type" attribute is required on the "script" element and the "alt" attribute is required for the "img" element. "Typical methods for encoding "&lt;script" tags for analysis and type "escape" ("&lt;" to escape the characters &lt; and &lt;)

### 5. Line 20 column-20: start tag for "TR" omitted, but its declaration does not permit this.

**error type:** &lt;error &gt;

**error type:** &lt;error &gt;

### 7. Line 20 column-20: required attribute "ALT" not specified.

**error type:** &lt;error &gt;

### 8. Line 20 column-20: start tag for "TR" omitted, but its declaration does not permit this.

**error type:** &lt;error &gt;

**error type:** &lt;error &gt;

### 10. Line 20 column-20: start tag for "TR" omitted, but its declaration does not permit this.

**error type:** &lt;error &gt;

### 11. Line 20 column-20: start tag for "TR" omitted, but its declaration does not permit this.

**error type:** &lt;error &gt;

### 12. Line 20 column-20: required attribute "ALT" not specified.

**error type:** &lt;error &gt;

### 13. Line 20 column-20: required attribute "ALT" not specified.

**error type:** &lt;error &gt;

### 14. Line 20 column-20: end tag for "TR" which is not finished.

**error type:** &lt;error &gt;

### 15. Line 35 column-20: cannot generate system identifier for general entity "SHOW".

**error type:** &lt;error &gt;

### 16. Line 20 column-20: general entity "SHOW" not defined and no default entity.

**error type:** &lt;error &gt;

This is a general usage error caused by an undefined entity reference in an external unencoded reference. See the previous message for further details.

### 17. Line 20 column-20: reference to entity "SHOW" for which no system identifier could be generated.

**error type:** &lt;error &gt;

This is a general usage error caused by an undefined entity reference in an external unencoded reference. See the previous message for further details.

### 18. Line 20 column-20: entity was defined here.

**error type:** &lt;error &gt;
Below are the results of attempting to parse this document with an SGML parser.

1. **Error**: Live 20 column 20: `document` type does not allow element `STYLE` here.
   - **Message**: element "<STYLE>
   - **Explanation**: The element name is illegal found in a context where it is not allowed. This may mean that you have incorrectly nested elements — such as a "<li>" element in the "head" section instead of "body" — or use elements that overlap (which is not allowed).

2. **Error**: Live 20 column 20: there is no attribute "BACKGROUND".
   - **Message**: attribute "<BACKGROUND>
   - **Explanation**: The attribute given above is requested on an element that you've used, but you haven't defined it. For instance, in most HTML and SGML document types the "type" attribute is required on the "script" element and the "alt" attribute is required for the "img" element.

3. **Error**: Live 60 column 60: start tag for "<a" omitted, but its declaration does not permit this.
   - **Message**: tag omission "<a"
   - **Explanation**: Tag omission "<a" is not permitted, as an attribute of an element must have an opening tag in this context.

4. **Error**: Live 20 column 20: required attribute "<ALT>" not specified.
   - **Message**: attribute "<ALT>
   - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

5. **Error**: Live 20 column 20: start tag for "<img" omitted, but its declaration does not permit this.
   - **Message**: tag omission "<img"
   - **Explanation**: Tag omission "<img" is not permitted, as an attribute of an element must have an opening tag in this context.

   - **Message**: attribute "<ALT>
   - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

7. **Error**: Live 20 column 20: start tag for "<img" omitted, but its declaration does not permit this.
   - **Message**: tag omission "<img"
   - **Explanation**: Tag omission "<img" is not permitted, as an attribute of an element must have an opening tag in this context.

8. **Error**: Live 20 column 20: required attribute "<ALT>" not specified.
   - **Message**: attribute "<ALT>
   - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

9. **Error**: Live 20 column 20: start tag for "<img" omitted, but its declaration does not permit this.
   - **Message**: tag omission "<img"
   - **Explanation**: Tag omission "<img" is not permitted, as an attribute of an element must have an opening tag in this context.

10. **Error**: Live 20 column 20: required attribute "<ALT>" not specified.
    - **Message**: attribute "<ALT>
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

11. **Error**: Live 20 column 20: start tag for "<img" omitted, but its declaration does not permit this.
    - **Message**: tag omission "<img"
    - **Explanation**: Tag omission "<img" is not permitted, as an attribute of an element must have an opening tag in this context.

12. **Error**: Live 20 column 20: required attribute "<ALT>" not specified.
    - **Message**: attribute "<ALT>
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

13. **Error**: Live 20 column 20: start tag for "<img" omitted, but its declaration does not permit this.
    - **Message**: tag omission "<img"
    - **Explanation**: Tag omission "<img" is not permitted, as an attribute of an element must have an opening tag in this context.

    - **Message**: attribute "<ALT>
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

15. **Error**: Live 20 column 20: element "<show" cannot be generated system identifier for general entity "<show".
    - **Message**: entity "<show"
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

16. **Error**: Live 20 column 20: general entity "<show" not defined and no default entity.
    - **Message**: entity "<show"
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

17. **Error**: Live 20 column 20: reference to entity "<show" for which no system identifier could be generated.
    - **Message**: entity "<show"
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>

18. **Error**: Live 20 column 20: entity was defined here.
    - **Message**: entity was defined here.
    - **Explanation**: This error is often caused by incorrect use of the "<STYLE>" document type with a document that uses frames (e.g., you must use the "<TRANSPARENT>" document type to get the "<FRAME>
